

WHA/PD Daily Digital Buzz

VIRTUAL STUDENT FEDERAL SERVICE

Project Title	WHA/PD Daily Digital Buzz
Project Summary	Create a daily email for social media practitioners that highlights and summarizes the latest tech and social media news.
Country	United States

Project Description

Many of us in DC and throughout the world that work on digital media for the State Department have little time to keep up with the latest tech and social media news. This includes changes in major platforms, new platforms, expert advice, and general think-pieces related to our work. Through a current summer intern, the Bureau of Western Hemisphere Affairs (WHA) Digital has started the “Digital Daily Buzz” that summarizes the top news of the day and sends it out to a wide audience. The response has been very positive and we’d like to continue the product, and consider enhancements, starting this August and onward.
